

Affiliation	Country	Checkbox	Goals	Impressions about the Event	Suggestions
Nagoya University	China	Excellent	Learn about Japanese history.	Very good.	
Nagoya University	China	Excellent	I've always wanted to visit the Tokugawa Art Museum, and I thought this event would help me better understand the history and background story instead of me appreciating the artifacts on my own.	It was very fun to know more about the differences of Japanese swords, and to even get hands-on experiences dessembling and assembling the katana. This is definitely a very unique experience that I wouldn't have been able to have if I just visited the museum as a usual visitor.	
Nagoya University	Laos	Excellent	The topic is interesting!	The program organization is excellent. Moreover, the detailed legal proceedings of the case study are very informative and relevant to my academic interests.	
Nagoya University	Madagascar	Excellent	Related to my major.	The event was interesting and we learn about Japan and it was also related to my actual major so very captivating.	
Nagoya University	India	Very Good	To know about the history of pollution acts of japan and to know about yokkaichi	Well organised Everything was in detail Probably some workshops could be added	

Nagoya University	Indonesia	Excellent	I am interested in environmental issues.	It was a fun experience and very valuable. I gained a lot of knowledge about the air pollution case in Yokkaichi. I also enjoyed seeing the beautiful industrial complex from the Yokkaichi port tower and meeting new friends.	I look forward to events that involve participating families.
Nagoya University	中国	Excellent	I want to understand the various efforts behind economic development	Economic development and environmental protection often appear to be at odds. The dilemma is whether to prioritize development first and address environmental issues later, or to pursue sustainable development concurrently. China has experienced rapid economic growth, but this has brought numerous environmental challenges. Therefore, it's crucial to learn from Japan's past experiences.	

Nagoya University	Ethiopia	Excellent	Environmental issues including air pollution is a global problem	I was very satisfied by the event. I have learned about the air pollution problems in Japan during rapid economic growth and the impact it had on the population and how the problem was tackled. Developing countries are facing all these environmental issues currently. I have realized it takes a lot of commitment from all the stakeholders to make the environment safe for living.	
Nagoya University	Philippines	Excellent	One of my research interest is on pollution and heritage conservation.	Everything went smoothly. The lecture was really informative and the tour was eye opening on the direct impact of pollution to society. It was easy to understand the lecture and tour because the staff were really good at speaking English. I would to join future program by Nagoya Ryugakusei Net.	
Nagoya University	中国	Excellent	友達を作りたいです	良かったです。環境汚染についていろいろ勉強しました。	外国人だけではなく、日本人も一緒に参加したらいいなと思います。

Nagoya University	China	Excellent	My research interest includes the environmental issues	It was good and I did not expect it to be such an inspiring workshop that tells how environmental issues really change people's lives (in a negative way). And I think it is exactly the idea of GSID where the development is more than just economic growth but more aspects like environment, laws, are playing a big part.	
Nagoya University	Iran	Excellent	I was curious to find out how they overcome the pollution in Yokkaichi city.	Abe さん's translation was amazing. Learning about the details of lawsuit in a realistic classroom setting felt like being present in the past. The bus tour through the complex made it even more tangible, like traveling back in time. I appreciate the efforts of those who spoke up and the professionals involved. In today's gray world, stories like this help me not to lose hope in humanity. Thank you!	
Nagoya University	Thailand	Very Good	To gain knowledge about pollution situation in Japan	I gained a lot of knowledge about Japan historical and development of air pollution, especially in the legal point of view. Especially the lectures about the negligence rule and joint liability are really interesting.	I think the lunch break time is a little bit too short.

Nagoya University	Vietnam		Deeper understanding of peak economic growth period in Japan and its drawbacks	It is well-prepared and helpful	I hope there will be more staffs/experts at the Miraikan who can tell their stories in English.
Nagoya University	Indonesia	Excellent	I wanna meet new connections	All the comittee is very humble and chill. I like to join to another event.	Maybe it have to add another participant and wider the information
